

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 26, 2010

Water Body Under Evaluation:

Water Body ID #: 3789
Name: Doolittle Creek (Class C)
Length of Segment: 2.3 miles
County (ies): Texas

Use Attainability Analysis (UAA) Study:

UAA ID #: 1301
Submitter: Olsson Associates
Date(s) Conducted: August 08, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and there were no WBCR observed. ATV tracks were observed leading to the creek signifying SCR use. An interview conducted with an adjacent landowner cited that the creek is usually dry, with a few shallow spring fed pools. Nothing deep enough for WBCR.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the maximum or median depth criteria for WBCR. There was a sign of SCR use in the form of ATV tracks, therefore the committee recommends that WBCR be removed, but SCR be added.

Committee Recommendation:

- ☐ Add Use ☐ Retain Use ☒ Remove Use
- ☐ Modify Use ☐ Inconclusive
